Metalworking Lubricants

RO1710 Straight Cutting Oil

RedLine Tools RO1710 provides benefits in productivity, equipment life, and environmental compliance. Clean Without Compromise: the operator is exposed to less mist and the machine to fewer residues. These economically priced, chlorine-free, cutting oils are designed to perform in a broad range of metalworking operations, offering superior lubrication to the machine tool and the work piece.

Key Features and Benefits:

- Excellent Filterability
- Superior Lubricity Package
- High Flash Point
- Low-Foaming, Low Odor
- Non-toxic, Chlorine Free

Recommended Maintenance:

In order to get the maximum life from your oil, keep the sump free of cleaners, solvents, rust inhibitors, coolants and other contaminants which may inhibit performance. RO1710 is designed to reject foreign contaminants, such as metal fines. If the performance of the oil begins to deteriorate, remove it from the machine, allowing fines and contaminants to settle in an empty drum or tank for 3-7 days, and return the top 80% to the clean machine.

Do not add other products unless recommended by RedLine Tools.

Health, Safety, and Environment:

For specific information, please refer to the SDS.

Packaging:

6000 gallon bulk, 330 gallon IBC, 55 gallon drum, and 5 gallon pails

Specifications:

Appearance	Specific Gravity	Water Solubility
Golden Liquid	0.87	0.01%
